- Command Line / Bash
- Adobe Illustrator / InDesign

## Education

### Full-Stack Web Development

CareerFoundry

Completed April 2025

### Bachelor of Arts

Media Informatics

Northern Kentucky University

Graduated 2015

## Professional Experience

### Stationery Works

Graphic Designer

July 2018 – Present

- Executed end-to-end workflows from vendor instruction to final output across hundreds of client projects.
- Balanced creative layout work with structured data integration, leading the Guest Addressing pipeline and resolving formatting challenges.
- Collaborated with internal teams and external vendors to meet design standards and delivery expectations.

### M. Hopple & Co.

Creative Consultant

February 2017 – July 2018

- Managed client projects from concept consultation through final delivery, ensuring cohesion across all project phases.
- Balanced aesthetic goals with technical constraints to deliver consistent and professional output.
- Interfaced directly with customers and handled production responsibilities independently across dozens of projects.

### Creative Invites and Events

Graphic Designer

December 2015 – November 2016

- Guided each client through the full design and production cycle, from ideation to delivery.
- Balanced customer needs with production feasibility while delivering personalized design outcomes.
- Adapted to rapidly changing requests and managed time-sensitive projects in a fast-paced environment.

## Web Development Projects

### S3 Upload App | Full-Stack App with AWS Infrastructure-as-Code

GitHub: [github.com/raschkatie/s3-upload-app](https://github.com/raschkatie/s3-upload-app)

- Built an image uploader that stores files in S3, triggers a Lambda function to resize them, and deploys via AWS
- Created all infrastructure manually, including VPCs, auto-scaling, and security groups

### MyFlix Angular App | Angular Front-End with Express/MongoDB Backend

GitHub: [github.com/raschkatie/myFlix-Angular-client](https://github.com/raschkatie/myFlix-Angular-client)

Live: [raschkatie.github.io/myFlix-Angular-app/welcome](https://raschkatie.github.io/myFlix-Angular-app/welcome)

- Built a responsive Angular SPA with routing, user login, and UI components using Angular Material
- Connected to a custom Node.js/Express API for user data, favorites, and movie catalog
